Dear Ms. Vestal:

On June 28, 2006, a complaint investigation survey was conducted at Guardian Angel Homes - Village Ops - Lewiston. The survey was conducted by Patrick Hendrickson, R.N. and Polly Watt-Geier, LSW. This report outlines the findings of our investigation.

Complaint # ID00001268

Allegation #1. The facility retained a resident who became violent and was a danger to himself and others

Findings: Based on observation, interview and record review it was determined on April 5, 2006 the identified resident did become aggressive. He threw pillows, swung a curtain rod, and threw a bar stool at a staff member.

Review of the identified resident's record on June 27, 2006 revealed the resident was admitted on December 23, 2006 with diagnoses which included Parkinson's and Alzheimer's.

The resident's record contained a Negotiated Service Agreement (NSA) dated February 11, 2006 which documented under the "Toileting" section that the resident required complete assistance and observation for all toileting needs. It further documented under the "Cognitive Capabilities, Level of Awareness" section the resident required one to one assistance from caregivers.

The resident's record also contained a behavior plan dated March 2006. It documented the resident could be aggressive toward staff when staff assisted

resident with cares. Additionally, it documented caregivers were to approach the resident calmly, speak quietly, and provide one to one attention.

The resident's record contained a caregiver statement dated April 6, 2006 (untimed). It documented the resident became aggressive when he was assisted with toileting, so another caregiver came to assist him. After toileting the resident became aggressive and threw pillows, swung a curtain rod, and threw a bar stool at a staff member.

Review of the facility progress notes documented the following:

On April 5, 2006 at 5:10 p.m., the L.P.N. was contacted by caregivers that resident had broken an end table, threw a sippy cup against the wall, and had thrown pillows at staff.

On April 6, 2006 at 2:00 p.m., the resident was temporarily moved into another house and his wife stayed with him until the resident was evaluated by a mental health provider. Caregivers were instructed to approach the resident 1 to 1 and if he became anxious to walk away and re-approach after five minutes.

Further review of the resident record revealed the physician had been monitoring the resident's medications from the end of March 2006 through the middle of April 2006. The record also contained a physician's note dated April 13, 2006 which documented the resident was evaluated for agitation. The physician documented the resident's agitation had decreased and he was less anxious.

Further review of the resident's record revealed an untitled statement from the administrator which documented the resident had an incident on April 5, 2006 at 4:14 p.m., where he had thrown pillows, moved furniture, and tossed a bar stool across the room. It documented the resident's behaviors were related to caregivers not following the toileting care plan. Additionally, it documented the two male caregivers were counseled by the administrator and had been required to take a refresher course related to dementia care.

On June 27, 2006 at 7:55 a.m., the facility Registered Nurse (RN) stated the resident was assisted with toileting by two male caregivers. She stated the resident would become agitated when approached by two people. Additionally, she stated the facility staffing pattern had been adjusted so there were never two male caregivers on duty at the same time.

On June 27, 2006 at 8:10 a.m., the administrator stated the resident did have an aggressive episode that was investigated. She stated the caregivers were counseled and the staffing pattern had been changed to prevent further incidents from

re-occurring.

Conclusion: Substantiated. However, the facility was not cited as they acted appropriately by counseling and re-educating caregivers, changing the staffing patterns of the facility to reduce the resident's anxiety, and sought mental health involvement to work with the resident for his anxiety and aggressive behaviors.

Based on the findings of the complaint investigation, the facility was found to be out of compliance with the rules for Residential Care or Assisted Living Facilities in Idaho. A Statement of Deficiencies has been issued to your facility. Please develop a Plan of Correction as outlined in the cover letter to the Statement of Deficiencies. AND/OR Non-core issues were identified and included on the Punch List.

If you have questions or concerns regarding our visit, please call us at (208) 334-6626. Thank you for the courtesy and cooperation you and your staff extended to us while we conducted our investigation.
